Superb Exam Dumps Materials lead you to get your certification easily - Actual4dump

**Exam :** 642-342

**Title :** Content Networking Exam (CN)

**Vendors :** Cisco

**Version :** DEMO

NO.1 You should configure content playback and replication bandwidth through the \_\_\_\_\_ GUI.

- A.Content Engine
- B.Content Router
- C.Content Services Switch
- D.Content Distribution Manager

Correct:D

NO.2 What are three benefits of terminating SSL traffic in a Content Switch? (Choose three.)

- A.eliminates the need for SSL
- B.maintains security by allowing data to be decrypted, processed, and re-encrypted within a single device
- C.enables the Content Switch to make load balancing decisions on HTTP-layer information
- D.reduces the number of digital certificates required in most web hosting environments
- E.reduces or eliminates server burden of negotiating SSL handshakes

Correct:B C E

NO.3 The transaction-logs enable command enables transaction logging. Which file will contain the

WMT server logs?

- A.local1/logs working.log
- B.local1/logs/wmt.log
- C.local1/logs/export/working.log
- D.local1/service\_logs/wmt\_start\_log\_latest

Correct:C

NO.4 You are using Content Switching for Server Load Balancing. What is the purpose of sticky

connections?

- A.They ensure that a TCP session remains active.
- B.They ensure an even load balanced server farm.
- C.They provide the ability to have connections from a client directed to the same server.
- D.They provide a means to collect statistics for an electronic commerce application within a content network.
- E.They provide the ability to have connections from a client directed to multiple servers without losing session information.

Correct:C

NO.5 What is the primary function of DNS?

- A.to replace DHCP
- B.to host file manager
- C.to serve as a source location on the Internet
- D.to resolve a client IP address to a MAC address
- E.to serve as a host name to IP address resolution

Correct:E

NO.6 What is the correct TCP three-way handshake connection setup?

- A.SYN - FIN - ACK
- B.SYN - DATA - FIN
- C.SYN - DATA - ACK
- D.SYN - SYN/ACK - ACK
- E.SYN - SYN/ACK - FIN/ACK

Correct:D

NO.7 You are using the active/standby method to implement a high availability Content Switching

design. What are three benefits? (Choose three.)

- A.less expensive
- B.easier to troubleshoot
- C.predictable traffic path
- D.increases the overall performance
- E.predictable failover behavior

Correct:B C E

NO.8 Which two statements are true about Content Routers in Application and Content Networking

System? (Choose two.)

- A.Content Routers store on-demand and pre-positioned content.
- B.Content Routers route content to the edges of a content network.
- C.Content Routers contain the IGP routing tables for the routed domain.
- D.Content Routers act as authoritative DNS servers for the routed domain.
- E.Content Routers choose the most suitable Content Engines to handle a particular clients request.

Correct:D E

NO.9 Why is the three-way handshake mechanism required for TCP session establishment?

- A.It keeps both sides of a connection from timing out.
- B.It ensures that both ends of a connection are synchronously established.
- C.There is less chance of interference and the session getting dropped.
- D.It ensures the connection is established between the correct stations.

Correct:B

NO.10 An NTLM-authenticated user is prompted for login name and password when attempting to access the public Internet. What happens to the user's request if he cannot provide valid user credentials?

- A.Access to the Internet will be allowed and the user's Internet activities will be logged by IP address.
- B.The user will be denied all access to the Internet.
- C.User access to the Internet will have less priority, resulting in slower Internet access than authenticated users.
- D.The user's manager will receive an automatic notification that the user failed to provide valid credentials.

Correct:B
